Xporter.py

GarbageTruck.py

- DCache Staging program deletes SAM and data files after 2(?) weeks (needs to set up FTS parameters)
- Xporter delete .finish files after processing
- All GarbageTruck now needs to do is delete .xml files when appropriate data files are gone from staging area after checking that the database has the appropriate information.

SAM staging (CD)

- What will be provided on what time scale is not clear.
- Need more interaction here.
